

How to transfer files to USB

Note: The DP-P2, DP-P1, DP-S1 and DP-H1 can transfer recorded files onto an external USB device. The FV-L1 cannot perform this function however the FV-L1 like the other units can transfer files from the Contents folder to an external USB device.

1. Switch on the Beyonwiz PVR and wait for a picture to show on the screen. If a picture doesn't appear, your PVR may need to scan your channels first – See “How do I do a Channel Scan?”
2. Connect your USB device to the box either through the front or rear USB port(s)
3. Enter the **FILE PLAY** menu by pressing the file player button located next to the **LIVE** button on the Beyonwiz remote
4. Use the **◀ ▶ ARROW** keys to move between **Movie, Music** and **Photo** (listed top left) and the **▲ ▼ ARROW** keys to move between **HDD, Network, USB** and **Memory Card** along with the **OK** button to select each option in order to find the desired file for copying

For example to highlight a file in the HDD “Recordings” folder you would:

Press the **FILE PLAYER** button > Use the **◀ ▶ ARROW** keys to navigate to **Movie** > Use the **▲ ▼ ARROW** keys to navigate to **HDD** and press **OK** > Use the **▲ ▼ ARROW** keys to select the **Recordings** folder and press **OK** > Use the **▲ ▼ ARROW** keys to highlight the desired file.

5. With the desired file to copy highlighted as though you are selecting it to play, press the **POP-UP** button to bring up the “**Pop Up Menu**”

*Note: Multiple files can be selected for copying by using the **▲ ▼ ARROW** buttons and pressing the **BLUE** button to tick the check box in the far right column*

6. With the Pop Up Menu on the screen, use the **▲ ▼ ARROW** keys to move to the “**Copy To**” option and press **OK**
7. An option menu will appear which is to select the destination you wish to copy to. Use the **▲ ▼ ARROW** keys to select **USB** and press **OK**
8. A box will pop up with a folder called “**Device**” followed by a number ie: “**Device1**” use the **▲ ▼ ARROW** keys to select the device and press **OK**
9. Two new folders will appear one being labeled with “...” and the other will have various names which are determined by the type or brand of USB device you connect to the unit. In this example the name is “**Unit0_P1**” use the **▲ ▼ ARROW** keys to select your named device and press **OK**
10. You will now see a folder marked “...” along with any other folders you have existing on your USB device. Use the **▲ ▼ ARROW** keys to highlight a folder or location you wish to copy to or highlight the folder marked “...” to copy to the root directory of your USB device and press the **RED** button to select the location and begin copying
